1. Introduction

This is going to overwrite the default contact form on Magento. The website administrator is able to add custom fields to contact form. All the values of the fields will be sent in email to the administrator. Moreover, the administrator can add an online map to the contact page in order for the clients to have an up-close and convincing look at the shop.

Features:

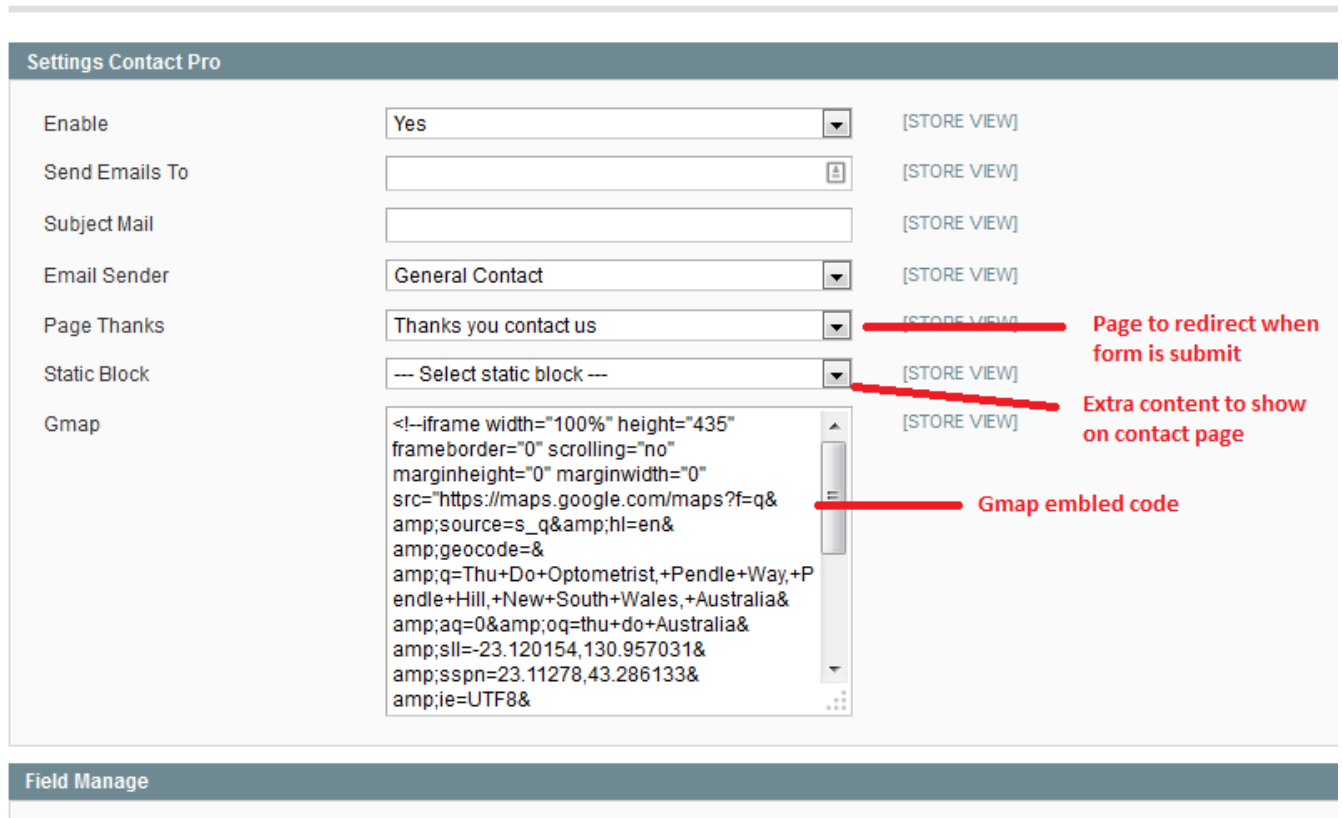

- Add new custom fields which are defined as mandatory or optional
- Establish the position for the newly added fields
- Add First name and Last name fields to the default Name field
- Insert map code to the form – allow Gmap and Yahoo Map
- Support Catpcha code to prevent spam messages
- Configure From email and To email which are different from the default configuration
- Intro text is pulled out from static block
- HTML & CSS and W3C validation

2. Configuration

From Admin panel > Mage Solutions > Contactpro > Configuration

1. General Setting

ContactPro

Settings Contact Pro

Enable	Yes	[STORE VIEW]
Send Emails To		[STORE VIEW]
Subject Mail		[STORE VIEW]
Email Sender	General Contact	[STORE VIEW]
Page Thanks	Thanks you contact us	[STORE VIEW]
Static Block	--- Select static block ---	[STORE VIEW]
Gmap	<pre><!--iframe width="100%" height="435" frameborder="0" scrolling="no" marginheight="0" marginwidth="0" src="https://maps.google.com/maps?f=q& amp;source=s_q&hl=en& amp;geocode=& amp;q=Thu+Do+Optometrist,+Pendle+Way,+P endle+Hill,+New+South+Wales,+Australia& amp;aq=0&aq=thu+do+Australia& amp;ll=-23.120154,130.957031& amp;sspn=23.11278,43.286133& amp;ie=UTF8&</pre>	[STORE VIEW]

Field Manage

2. Add Custom Field

- In tab Field Manage click to Add Field
- Enter field label, required or not, position and status for each field
- You can remove field by click Remove this field button

Field Label	<input type="text" value="Address"/>
Required	<input type="text" value="Yes"/>
Position	<input type="text" value="3"/>
Status	<input type="text" value="Enabled"/>
<input type="button" value="Remove this field"/>	

3. Frontend

- When you done the setting, got to frontend and his url <http://yourdomain.com/contactpro/> this is the new contact form for your site.

Tip:

- To change the url of contact page, you can go to: site folder/app/code/local/MGS/Contactpro/etc/
- Open file config.xml by an editor (Notepad ++ or Editor Plus)
- See line 14, change the text “contactpro” to any text you want.

```
( <args>
  <module>MGS_Contactpro</module>
  <frontName>contactpro</frontName>
</args> )
```
